

MEDTRONIC ENDOSCOPY

Endoflip™ 300 Impedance Planimetry System

The Endoflip™ 300 impedance planimetry system measures pressure and dimensions in the esophagus, pylorus and anal sphincters using a balloon catheter, providing real-time physiologic data that other diagnostic modalities cannot. It helps identify esophageal motility disorders and provides intraoperative assessment during Heller myotomy and POEM procedures.

- Real-time display of diameter estimates at up to 16 points within the balloon catheter
- Measures pressure and dimensions in the esophagus, pylorus and anal sphincters
- Adjunctive tool in the evaluation of GI motility disorders such as achalasia
- Real-time assessment of LES myotomy during Heller myotomy or POEM
- Indicated for adults, and for esophageal measurement in patients from 5 years of age

At a glance

Brand / Division	Medtronic Endoscopy
Specialties	Endoscopy
Local support	On-site demonstration · Clinical training · Installation · After-sales service
Availability	Hospitals across Gujarat, via Western Trading Company, Ahmedabad
