

MEDTRONIC ENT

NuVent™ EM Balloon Sinus Dilation System

The NuVent™ EM balloon sinus dilation system combines balloon sinus dilation with surgical navigation for the treatment of chronic rhinosinusitis. Its rigid balloon sinus seekers have built-in AxiEM™ electromagnetic tracking, pre-calibrated for StealthStation™ navigation, so surgeons can confirm placement before dilating the sinus outflow tract.

- Balloon sinus seekers with built-in AxiEM™ electromagnetic tracking
- Locate the drainage pathway under navigation, then inflate to move tissue and bone blocking the sinus outflow tract
- Dedicated frontal, maxillary and sphenoid seeker designs
- Simple three-part system: balloon sinus seeker, tubing and inflator
- NuVent™ eustachian tube dilation balloon available for persistent eustachian tube dysfunction

At a glance

Brand / Division	Medtronic ENT
