

MEDTRONIC ENT

StealthStation™ ENT Navigation System

The StealthStation™ ENT navigation system uses electromagnetic tracking to enable image-guided surgery during ear, nose and throat procedures. Running on the StealthStation™ S8 platform, it gives surgeons real-time positioning information to navigate in and around the sinuses and away from critical structures.

- Electromagnetic navigation with no line-of-sight limitations
- Two emitter options — side-mount and flat emitter — for flexible surgical setup
- Tracks multiple navigated instruments simultaneously, including navigated microdebrider blades and the NuVent™ EM balloon
- Supports FESS, endoscopic skull base and lateral skull base procedures
- Integrates with Medtronic powered ENT instruments for a complete image-guided workflow

At a glance

Brand / Division	Medtronic ENT
Specialties	ENT
